📍 Palnadu, Andhra Pradesh - 522613

SUMMARY

I am a motivated and detail-oriented Computer Science Engineering student specializing in Artificial Intelligence. With strong knowledge in Java, Python, Full Stack Development, and Machine Learning, I am passionate about developing innovative software solutions and AI-driven applications. I seek to contribute my technical skills and creativity while continuously learning and growing in a challenging environment

EXPERIENCE

Computer Science Engineering Student

Fresher

📅 02/2026 - Present 📍 vadodara, gujarat, India

A motivated fresher in the field of Computer Science with a focus on academic projects and software development

- Currently focused on academic projects, AI learning, and software development
- Continuously improving technical skills in Machine Learning, Full Stack Development, and problem solving
- I have Worked on the event management system project which is help me in the problem solving skills and teamwork

EDUCATION

 SSC Thirumala Oxford School 📅 06/2020 - 04/2021 📍 Piduguralla, Andhra Pradesh, India	GPA 8.3 / 10
 Intermediate MPC Oxford Junior College 📅 06/2021 - 04/2023 📍 Piduguralla, Andhra Pradesh, India	GPA 65.6 / 100
 B.Tech CSE-AI Parul University 📅 08/2023 - 01/2027 📍 Vadodara, Gujarat, India	GPA 6.45 / 10

SKILLS

Python	Full Stack Development	java
Machine Learning (ML)	Database Management	
Git & GitHub	Gen AI	

PROJECTS

Event Management System

📅 12/2025 - 03/2026

A project aimed at automating the process of event management

- Developed a web-based Event Management System for automating event registration and participant management
- Implemented user authentication features including login, signup, and forgot password functionality
- Created an admin dashboard to manage events, schedules, and participants efficiently
- Integrated email notifications for event updates and communication

AI Resume Screening Platform

📅 01/2026 - 06/2026

Built an AI-based recruitment system that automates resume parsing, candidate evaluation, and job matching using NLP and BERT models. Developed a scoring and ranking engine with a recruiter dashboard for efficient hiring. Reduced manual screening effort and improved candidate selection accuracy.

- Developed an AI-powered recruitment platform that automates resume screening, candidate ranking, and job matching using Natural Language Processing (NLP) and Machine Learning techniques.
- Implemented resume parsing to extract skills, education, experience, and certifications from PDF/DOCX resumes with high accuracy.
- Built a semantic matching engine using NLP and BERT-based models to compare candidate profiles against job descriptions and generate ranking scores.
